

Fence Guidelines

- Compliance required for zoning (setbacks, height)
- Hole diameter is required to be 8" larger than the post
- Hole depth is to be 42"
- Place post on six inches of drain rock
- Pour concrete around post. Taper top to drain water away (see detail).
- Wood shall be either pressure treated, redwood, or cedar.
- Screws shall be either galvanized, stainless steel, or weather resistant.
- Post spacing is eight feet maximum.
- Building permit required for fences.
